# Washington Agriculture

The Washington State Department of Agriculture serves the people of Washington by supporting the agricultural community and promoting consumer and environmental protection. Our major goals are to:

- Protect and reduce the risk to public health by assuring the safety of the state's food supply.
- Ensure the safe and legal distribution, use, and disposal of pesticides and fertilizers in Washington state.
- Protect Washington state's natural resources, agriculture industry, and the public from selected plant and animal pests and diseases.
- Facilitate the movement of Washington agricultural products in domestic and international markets.

A WSDA Lab Tech analyzes seed for purity or germination.

The Washington State Department of Agriculture (WSDA) carries out more than 25 distinct programs that support the agricultural community and promote consumer and environmental protection. WSDA has about 650 full-time employees and employs many others seasonally or intermittently to work in inspection and insect detection programs. Most programs are fee-supported.

WSDA is headquartered in Olympia with program offices located in Yakima, Spokane and a number of other communities in Eastern and Western Washington. In addition to administration, WSDA has five divisions.

A WSDA Brand Inspector inspects cattle for brands at a livestock market.
