

ORGANIC SYSTEM PLAN– CROP PRODUCERS

Business Name:	Certification Number:
----------------	-----------------------

Section I. Farm Equipment

[NOS 205.272]

Procedures must be in place to prevent contamination of organic crops. Records verifying that steps have been taken to prevent contamination of an organic crop must be available during your inspection.

1. Is the same equipment (owned, borrowed, leased, or lent) used on organic and conventional crop? Yes No

1a. Check shared equipment:

planting

harvesting

input material application

transportation

Tip! This question specifically refers to shared equipment that comes in direct contact with crop, seeds, transplants, input materials, or anything else that poses a contamination or commingling risk.

1b. If yes, how do you ensure that equipment is cleaned and won't contaminate your organic crops?

2. Do you have custom work done on your organic crops? (planting, material application, harvesting, transportation) Yes No

2a. If yes, how do you ensure that equipment is cleaned and won't contaminate your organic crops?

Tip! Records regarding harvest, including the cleaning of the harvest equipment, by an outside business must be available during your inspection. Failure to have this information will delay certification.

1. What type of equipment cleaning documentation is maintained?

Clean truck/equipment affidavits

Standard Operation Procedures (please attach)

Clean out checklists/records

Other (please specify):
