

ORGANIC SYSTEM PLAN – HANDLERS AND PROCESSORS

Business Name:	Certification Number:
Name of Individual Completing this Form:	County:

Section E. Post Harvest Materials	[NOS 205.105, 205.272, 205.601, 205.605]
--	---

Not Applicable – No organic products are handled or stored (e.g. Brokerage and Marketing Companies)

Tip! A post harvest material is a substance that is used on a raw organic crop prior to packaging or processing of the crop. These direct food contact materials include sanitizers, floatation agents, waxes, and sprouting inhibitors. In order to use a direct contact material with an organic crop, the material must be an approved natural product or must be listed in the National Organic Standards (National List § 205.601, 205.605, 205.606).

1. Please indicate what type(s) of post harvest materials are used at your facility. Check all that apply.

<input type="checkbox"/> NONE - Go to Next Section	<input type="checkbox"/> Anti-Microbial Agents	<input type="checkbox"/> Anti-foaming agents
<input type="checkbox"/> Waxes	<input type="checkbox"/> Anti-Fungal Agents	<input type="checkbox"/> Sanitizers
<input type="checkbox"/> Floatation Agents	<input type="checkbox"/> Sprouting Inhibitors	<input type="checkbox"/> Other (please specify):

2. Does your operation use a material prohibited for direct contact with organic products on any Non-Organic products that are handled on or with shared equipment? Yes No
 - 2a. If “Yes,” describe how you ensure prohibited materials do not contaminate organic products.

Tip! Any post harvest materials used in the course of organic handling must be included on your non-organic substance spreadsheet. Materials may be added or removed at any point in the year by contacting the Olympia office.
