The Organic Product Summary (AGR 2250) is the comprehensive list of all products that you would like to appear on your Organic Certificate. Please list *each product* that you would like to have certified. ***In addition to the Product Summary, please submit the following information:***

✓ **Label Claim**

The National Organic Program has specific rules regarding label claims on organic processed products. ***For each product listed on the Product Summary, please indicate the label claim per the following definition:***

- Products labeled as “100% organic” must contain 100% organic ingredients, including processing aids.
- Products labeled “organic” must contain at least 95% organic ingredients; non-organic agricultural ingredients must not be commercially available in an organic form and be listed on Section 205.606 of the National List; and all synthetic ingredients and processing aids must be on the National List.
- Products labeled “made with organic (specified ingredients or food groups)” must contain at least 70% organic ingredients.

✓ **Product Information**

For each product listed on the Product Summary, please note and submit the following:

- **Private Labels** – Private label products are typically those manufactured or provided by one company for offer under another company's brand. ***For each product listed, indicate whether the product is a private label.***
- **Label and Formulation** – For each product listed, you must submit a Product Formulation Form (AGR 2178). These forms must be submitted for single ingredient products as well as formulated products and include all processing aids as well as ingredients. In addition, a label must also be submitted for each product. Please note both wholesale and retail labels must be submitted and no more than 8 ½" x 11" in size.
- **Organic Form** – ***For each product listed, please indicate if it is produced in both an organic and a non-organic form.*** These products are considered “parallel” products and have additional control points in regards to contamination and commingling.

✓ **Ingredient Information**

Verifying that ingredients comply with the National Organic Standards is an on-going process for both companies and organic certifiers. For each ingredient listed on your product formulation, please supply the following information:

- **Organic Certificates** - All agricultural ingredients must be certified organic and you must be able to demonstrate that each load of agricultural ingredients complies with the National Organic Standards. ***For each product listed, indicate whether you maintain current organic certificates for all agriculture ingredients in the product.***
- **Non-Organic Ingredients or Processing Aids** – There are two types of non-organic ingredients and/or processing aids, with specific verification requirements.

Non-Organic Agricultural – Non-organic agricultural ingredients are allowed as minor ingredients if they are not commercially available in an organic form *and* are listed on §205.606 of the National Organic Standards. In addition, you must submit verification that the non-organic ingredient was not produced with genetically modified organisms, sewage sludge, or irradiation. ***Please submit the following for each non-organic ingredient:***

- Completed WSDA Ingredient Affidavit (AGR 2252)
- Completed WSDA Commercial Availability Log (AGR 2251)

Non-Agricultural – Non-agricultural ingredients and processing aids are allowed for use in processed products, if listed in §205.605 of the National Organic Standards. In addition to verifying that these substances have not been produced with genetically modified organisms (GMOs), sewage sludge, or irradiation, many of these ingredients have annotations within the National Organic Standards that must also be verified. ***In order to update our records, please submit verification of compliance with any annotations noted in Section 205.605 of the National Organic Standards.***

**Note that a WSDA Ingredient Affidavit may be used as a tool to verify compliance of citric acid, yeast, and enzymes.*

Records regarding the compliance of nonorganic minor ingredients or processing aids must be maintained by your company and must be available at each inspection.
