Tip! If you include a generic material rather than a specific brand name, you are responsible for assuring that all of the material's ingredients are allowed for organic crop production. All material ingredients must be nonsynthetic unless specifically approved on the National List of Allowed Substances [205.601 – 205.602].
 Failure to have documentation at your inspection will impact or delay your organic certification.
 Keep a copy of this Organic System Plan Update and Materials Inventory as a reference for your inspection.
