Your Company Name: _____	WSDA Issued Company Number: _____	WA Product Reg. Number: _____
--------------------------	-----------------------------------	-------------------------------

This is an alternative form to completing form 4300B. It **may be used ONLY** if all of the following conditions exist:

- (1) You are repackaging a single chemical compound (i.e. urea, MAP, DAP, etc.).
- (2) The single chemical compound is currently registered in Washington State by your supplier(s).
- (3) You do not amend or blend it with additional materials.
- (4) Your company name and address is on the label.

If these conditions **do not exist**, you must use form 4300B to register your product(s).

Your Complete Product Name: _____	GRADE: _____
<i>For detailed instructions, please see reverse side.</i>	

Supplier(s) WA Product Registration Number(s):	Waste Derived or Micronutrient?	Supplier Name:
	W    M    N/A	
	W    M    N/A	
	W    M    N/A	
	W    M    N/A	
	W    M    N/A	

**INSTRUCTIONS FOR FORM 4300C –  
FERTILIZER REGISTRATION FOR PACKAGED SINGLE CHEMICAL COMPOUNDS  
(This is an alternative form to completing form 4300B)**

**This form may be used only if all the following condition exists:**

(1) You are repackaging a single chemical compound (i.e., urea, MAP, DAP, etc.); (2) the single chemical compound is already registered in Washington by your supplier(s); (3) you do not amend or blend it with any additional materials. If these conditions do not exist, you are not allowed to use this form and must use form 4300B and submit a metals analysis of the product; and (4) your company name and address is on the label.

**Information required:**

- (1) **Company Name and Company Number:** Your company name and address is on the label. The company number is assigned by the WSDA. If you currently register fertilizers in Washington, place your company number in the appropriate place. If you are registering fertilizers for the first time, leave this space blank.
- (2) **WA Product Registration Number:** This number is assigned by the WSDA. If you are renewing the registration of an existing product, you can find the WA Product Registration Number on your company registration certificate. If you are registering the product for the first time, leave this space blank.
- (3) **Product Name:** Indicate the name of the product as it appears on the product label.
- (4) **Grade:** List the grade as it appears on the product label (grade is Nitrogen-Phosphorous-Potash).
- (5) **Supplier WA Product Registration Number(s):** List the WA Product Registration Number(s) for suppliers of the material that you are repackaging. You can get this information from your supplier(s). You may also get this information at the WSDA website, [agr.wa.gov](http://agr.wa.gov). If the product is not registered in Washington State, you can not register your product using this form.
- (6) **Waste Derived or Micronutrient?:** You can get this information from your supplier(s). Indicate by circling the W for “Waste Derived Fertilizer,” M for “Micronutrient Fertilizer” or “N/A” if those designations do not apply to this product based on information supplied to you from the manufacturer of the material. These definitions can be found in RCW 15.54.270 (definitions).
- (7) **Supplier Name:** Indicate the name of the manufacturer who registered the single chemical compound in Washington State.

**REMEMBER: All sources of the material you are repackaging must be registered in order for you to register your product using this form.**

If you have any questions concerning use of this form, please contact the WSDA office at (360) 902-2025, by e-mail at [fertreg@agr.wa.gov](mailto:fertreg@agr.wa.gov), or by fax (360) 902-2093.
