Steps to Obtaining a Structural Pest Inspector License

- Step 1:** If you are setting up your own business, you will need a business license from the Department of Licensing. To learn more, you can contact DOL at (360) 664-6487 or view information on the Internet at <http://www.dol.wa.gov/business/homeinspectors>.
- Step 2:** Determine whether or not you need a Washington State Department of Agriculture (WSDA) Structural Pest Inspector (SPI) license by reading the *Structural Pest Inspector Requirements* fact sheet. It is available by calling 877.301.4555 or on-line at <http://agr.wa.gov/PestFert/Pesticides/docs/058SpiReqFactSheet.pdf>.
- Step 3:** If you **DO** need to be licensed as a SPI, the most difficult, time-consuming and expensive step involves securing the required financial coverage. The *SPI Requirements* fact sheet details the four coverage options. Additional information, including the forms your agent must submit to WSDA, is at <http://agr.wa.gov/PestFert/LicensingEd/CaSpiInfo.aspx>. WSDA recommends that you research your ability to obtain this coverage prior to making a final decision about performing complete wood destroying organism (WDO) inspections.
- Note: As of September 1, 2009, Home Inspectors are required to be licensed by the Department of Licensing. Both Home Inspectors and SPIs are required to report the presence of wood rot (decay) and conducive conditions leading to decay. A Home Inspector must be licensed as an SPI if they wish to report the presence of wood destroying insects and damage by these insects. See the fact sheet [What Home Inspectors Can Say about Wood Destroying Insects](#) for additional information.
- Step 4:** Obtain the study materials necessary to pass the Structural Pest Inspector exam. These are detailed in the *Structural Pest Inspector Examination Process* fact sheet available from Pesticide Licensing at 877.301.4555 or on-line at <http://agr.wa.gov/PestFert/docs/StudyInfo.pdf>.
- Step 5:** Thoroughly study all the recommended study material. If at all possible, spend time in the field with an experienced inspector. This will help with the practical portion of the SPI exam. The exam consists of a 100-question general knowledge exam and a 50-question practical exam that requires the tester to identify samples of WDOs and their damage.
- Step 6:** As soon as you know when you will be ready to test, make a reservation for a test session by calling Pesticide Licensing at 877.301.4555. The *Pesticide/Pest Inspector Licensing Fact Sheet* at <http://agr.wa.gov/PestFert/docs/Form4375.pdf> provides more information. You must pass both parts of the exam with a score of 70% or higher.
- Step 7:** **If you are the company owner:**
- ⇒ make sure that your agent submits the required proof of financial coverage. This must be on the correct WSDA form!
 - ⇒ submit a SPI Company License Application available at <http://agr.wa.gov/PestFert/docs/4175-SPICompanyLicenseApp.pdf>.
- If you are an employee of a SPI Company:**
- ⇒ make sure your employer adds you as an employee under their license. They can use the company license application form identified above.
