

ACTIVITY LOG - CRITERIA

Any person not employed by the Primary Applicator, who provides assistance with a chemigation application, must record all of their activities with the corresponding timeframe on an Activity Log. Prior to entering an application site, you must be familiar with the pesticide label precautions with regard to entry restrictions, PPE, and applicator and handler activities. Always follow Worker Protection Standard requirements (when applicable).

The "Activity Log" shall be located at the injection site and shall contain the following reference information:

- **Primary Applicator's name**
- **Primary Applicator's telephone number**
- **Location(s) of the application**
- **Irrigation system number(s) or other form of irrigation system identification**
- **Full Pesticide Product Name and EPA Registration Number**

Any visit to an application site by a person assisting with a chemigation application must be noted on the Activity Log in a format provided by the Primary Applicator. Each visit must record:

- **Name of the person providing the assistance
(Other than the Primary Applicator or an employee of the Primary Applicator)**
- **Company or farm name**
- **WSDA Pesticide License Number, if applicable**
- **Telephone number**
- **Date**
- **Arrival Time / Departure Time**
- **Activity performed / Observations made**

Additional recorded information may include, but not limited to, the following:

- Wind Speed and Direction
- Temperature
- System inspection, note type of activity
- Calibration check, if made
- Volume of waterflow
- Direction of system movement and area covered by the system while at the site
(Note compass orientation of pivot while at site)
- Maintenance or repair performed
- Monitoring
- Summary of activities undertaken

The Primary Applicator must receive the activity log upon completion of the application. The log must be jointly retained with the pesticide application record as a permanent record. To be valid, a signed WSDA Assistance Agreement must also accompany the pesticide application record and activity log.
