Statewide Stop Sale on Following Products

ACTION REQUIRED

Date: June 29, 2016
To: Pesticide Distributors
Subject: 15 Products Contain Undisclosed Pesticide Ingredients

The Washington State Department of Agriculture (WSDA) has detected one or more undisclosed pesticide ingredients in the following 15 products. The WSDA has issued statewide stop sale orders for these products. **You should stop distribution of all of these products that you may currently be distributing.** These may be returned to your supplier.

Several of these products contain ingredients that are not allowed for use on marijuana. This could cause marijuana to fail the Washington State Department of Health pesticide testing requirements for compliant marijuana products. In addition, some of these ingredients could result in the Washington State Liquor and Cannabis Board confiscating and destroying marijuana if they are found on recreational marijuana above certain levels.

Pesticides:

1. Safergro Mildew Cure for Powdery Mildew Control, WA Reg. No. 68573-08004
